

I listen to KLOVE on 91.3 in San Antonio, Texas. This station is very important to my family. We listen to it at home and in the car. I feel it is vital to the well-being of my family to have this station a part of our family entertainment and listening pleasure. The service they provide is important and truly serves an area of the public that is not serviced by another station in our area. I do not want a LPFM to replace this signal.
